

Boston Life Labs joins ng Connect Program to Advance the Adoption and Development of Next Generation Healthcare Technologies

Will work with member companies to drive the advancement of the connected user experience in the Healthcare Delivery industry

Boston, MA, November 16, 2011 — Boston Life Labs, LLC today announced its participation in the [ng Connect Program](#), the multi-industry open innovation program founded by [Alcatel-Lucent](#) (Euronext Paris and NYSE: ALU) to create the new connected user experience. By joining the program, [Boston Life Labs](#) plans to provide patient biometric data in support of a new healthcare service concept that will be unveiled at the Consumer Electronics Show in Las Vegas, January 2012.

Boston Life Labs brings their Wireless Medical Devices and Hbox Hub to the project. The robust, affordable, plug-and-play technology allows real-time biometric data collection that can aid in swift and immediate medical decisions being made remotely by clinicians. Within the concept, patient biometric data will be collected and displayed using the Boston Life Labs Telehealth Solution.

“Boston Life Labs is excited to join the ng Connect Program. We believe that the concepts and collaborative projects the ng Connect Program develops will allow us to make a global impact on technical development and implementation within the healthcare delivery system,” Said Richard Binier, CEO, Boston Life Labs.

“We are pleased to have the Boston Life Labs technologies and input as part of the ng Connect Program. Health and wellness is a key focus area for us moving into 2012, and Boston Life Labs adds a unique perspective thanks to their innovative offerings. They provide a unique solution in biometric data collection and transmission that will bring patient monitoring to the forefront of healthcare,” said Jason Collins, VP of Emerging Technology and Innovation, Alcatel-Lucent.

About Boston Life Labs

Boston Life Labs is a healthcare technology company dedicated to research and development of Telehealth Systems, headquartered in Boston, Massachusetts. Its team of engineers and healthcare professionals are driving innovation in the telehealth services market. The company’s vision is to provide robust, affordable, wireless and plug-and-play telehealth solutions around the world. For more information, visit: www.bostonlifelabs.com or visit us on Facebook.

About The ng Connect Program

The ng Connect Program is dedicated to the creation of the new generation connected user experience. With its dynamic multi-industry membership, the organization drives relevance and new business models through innovation. ng Connect has increased awareness in the telecommunications industry and among consumers of the possibilities of LTE and next generation technologies with the development of 20 service concepts including the [Virtual Personal Stylist](#), Fan Cam, Gametime Media Table and the [LTE Connected Car](#). Founded by Alcatel-Lucent, ng Connect is comprised of more than 80 members including leading network, consumer electronics, application and content providers. For a full list of members please visit: <http://www.ngconnect.org/members/index.htm> and for more information on the ng Connect Program, visit: www.ngconnect.org.
